Language Arts: The quarter is going by quickly! The kids have been doing a great job picking up on character traits; inferencing; building our knowledge of figurative language and reviewing basic grammar.

Students are continuing their study of Memoirs. A Memoir is a piece of writing that explores the author's relationship with an important place, person, animal or object.

Science: This week we will add rubber band power to our cars to learn more about potential and kinetic energy. We will also look at the design of our cars, and other cars to see how the design itself has an impact on how fast the car moves. Students should be reading their notes daily and working on their Moby Max Science work.

SS: Students will be learning about the economic interdependence between countries as well as the imports and exports of these countries.

Math: As was the case with this unit, next week's unit is a quick one! We will be working with the Powers of 10. Students will recognize that a digit in one place is 10 times as much as it represents in the place to its right. AND that a number to the left of that place is 1/10 of what it represents. We will have our next math test (5.NBT1 & 2) on Friday, October 13.

Important Dates

- Oct. 12 – Fall Pictures
- Oct. 14 – MPE Autism Walk/Run
- Oct. 20 – Early Release

Daily Schedule

8:45-9:15 Arrival/ Morning Procedures
